Subject: Invitation to Peer Review #IJOT-D-10-00452

> Dear Prof. Celebonovic:
>
> The manuscript entitled "Thermotropic, Thermo-morphologic and
> Thermo-optical Properties of New Smectogenic Calamitic Compounds
> Containing Imine Linking Groups" by "Professor Arif Nesrullajev, Cigdem
> Yorur-Goreci, PhD; Belkis Bilgin-Eran, PhD" has been submitted for
> publication in the International Journal of Thermophysics, and we would
> appreciate your comments on its suitability for publication.
>
> The International Journal of Thermophysics publishes papers on
> thermophysical properties of matter in the solid, liquid, and gaseous
> states in all ranges of temperature, pressure, wavelength, and other
> relevant variables. Areas covered include: experimental and theoretical
> studies of thermodynamic, transport, thermal radiative, and other related
> properties; new developments in measurement techniques; critical
> evaluation of thermophysical properties data; reviews of current topics in
> thermophysics; and selected technological applications of thermophysics.
>
> In the review, particular attention should be paid to the following: (1)
> quality of work, (2) consistency of symbols and units with accepted
> practices, (3) completeness of presentation of results, (4) discussion of
> sources and magnitudes of errors, and (5) language and clarity of text.
