Прилог 1

Topics

01. Spectroscopy, Analytical Chemistry and Photochemistry
02. Imaging, Tomography, Microscopy, Thermography and Depth Profiling
03. Thermophysical Properties and Characterization of Materials
04. Electronic, Optical Materials, Semiconductors, Thin Films and Devices
05. Nanoscale Phenomena, Nanostructures, Graphene and Single-Layer Materials
06. Laser Ultrasonics
07. Ultrafast Phenomena
08. Non-Destructive Evaluation and Industrial Applications
09. New Instrumentation, Measurement Methodologies and Applications
10. Biological, Medical, Agriculture, Food and Biotechnology Applications
11. Biomedical Imaging with Particle Beam, Photons, Ultrasound and Heat
12. Environmental Sensors and Applications

Belgrade, September 2013

Letter of support to host and organize:

18th International Conference on Photoacoustic and Photothermal Phenomena – ICPPP18, 2015, in Novi Sad, Serbia.

Dear colleagues,

The Institute of Physics Belgrade, in cooperation with Institute of Multidisciplinary Research, University of Belgrade, with strategic support from:

Ministry of Education, Science and Technological Development of the Republic of Serbia;
Tourism Organization of Serbia;
Tourism Organization of Novi Sad;

and with valuable assistance from the Serbia Convention Bureau, will provide full support to host and organize the **18th International Conference on Photoacoustic and Photothermal Phenomena – ICPPP18**, to be held in **2015, Novi Sad, Serbia**.

The Institute of Physics Belgrade (IPB) is recognized both in Serbia and the region as one of the leading research institutions. IPB's specific combination of working attitudes, customs and unique spirit has made it a unique European research institution. The institution's human and infrastructural capacity is used in basic science, as well as a generator of technological advances.

The mission of the IPB is to promote knowledge and educate new researchers in the general field of physical sciences and associated technologies, with the aim to bring into successful realization national and global needs of modern society. IPB was founded in 1961, and since then has acquired expertise in a wide number of research areas in the physical sciences and their associated technologies, as well as in supporting areas such as the organization of a variety of international and national conferences, workshops and summer schools (e.g. ESCAMP1G, ICOM, Symposium on the Physics of Ionized Gases – SPIG, Condensed Matter Physics – SFKM).

Research in the fields of photoacoustic and photothermal sciences has been a part IPB research effort for more than three decades. This is one of the reasons why IPB is ready to support Serbia as a destination to host the 18th International Conference on Photoacoustic and Photothermal Phenomena, in 2015. We aim to make this conference successful and memorable.

Sincerely,

Aleksandar Belić
Dr. Aleksandar Belić, Director
Institute of Physics Belgrade

Republic of Serbia
MINISTRY OF EDUCATION
SCIENCE AND TECHNOLOGICAL
DEVELOPMENT

Date: October, 21 2013.
Belgrade
22-26 Nemanjina Str.

SUBJECT: 18th International Conference on Photoacoustic and Photothermal Phenomena , 2015

To whom it may concern:

Ministry of Education, Science and Technological Development is pleased to support the organization of 18th International Conference on Photoacoustic and Photothermal Phenomena, 2015, Novi Sad, Republic of Serbia.

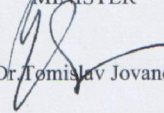

The conference will be approval of the devoted work of our researchers in that field in the last 30 years. In addition, this would be the first time that this international conference is organized in the region of Southeastern Europe.

We kindly appreciate your support for Serbia to host 18th International Conference on Photoacoustic and Photothermal Phenomena, 2015. We take responsibility to ensure successful and memorable arrangement of the conference.

Yours sincerely,

MINISTER

Prof. Dr. Tomislav Jovanović
